MATERIALS, SOCIETIES & CHOICES

**Societies use earth materials like minerals,
renewable resources, and water in complex ways.**

This course explores decision-making in the context of earth materials and the challenges that arise from the many needs and perspectives of diverse stakeholders. Presentations & discussion are combined with workshops that introduce and apply decision science to the issues of meeting resource needs in the most environmentally sustainable, equitable, and affordable ways possible.

**Tuesdays & Thursdays
11 am - 12:15 pm**

Psychology
Room 307

Gen Ed:

- Exploring Perspectives: Natural Scientist
- Quantitative Reasoning
- Diversity & Equity: US Context

THE UNIVERSITY OF ARIZONA

**School of Mining
& Mineral Resources**
