

NEW COURSE: MIN498 SENIOR CAPSTONE

Thursdays, 4 - 6 pm

Physics-Atmospheric Sciences
Room 416

Synthesize your knowledge & skills around non-renewable mineral resources.

Work in small inter-disciplinary teams to produce a culminating project that presents sustainable and responsible solutions to technical, economic, social, and environmental issues in mining & mineral resources.

Implement data-driven decision making, effective communication, and critical thinking to bridge the gap between humans' ever-increasing demand for minerals and societies' changing priorities toward the environment and communities.

Instructor

Misael Cabrera, PE

THE UNIVERSITY OF ARIZONA

**School of Mining
& Mineral Resources**
