

STRUCTURAL GEOLOGY

for GEOTECHNICAL PROFESSIONALS

Self-paced & online course
starting June 16, 2026

COLLEGE OF ENGINEERING
School of Mining
Engineering & Mineral
Resources

Offered by the **Geotechnical Center of Excellence** at the University of Arizona, this online, asynchronous, professional development course is designed for self-paced learning on your schedule. The course includes 24 hours of pre-recorded content developed by the GCE and industry subject matter experts. Upon course completion a professional development certificate is provided.

Structural geology is a critical aspect of mining geotechnical engineering. This professional development course is designed to provide geotechnical professionals with the fundamentals of structural geology and its applications throughout the mine cycle. This course is designed for geotechnical professionals, consultants, students and anyone who wants to strengthen their understanding of structural geology and the critical role it plays for all stakeholders involved in mine development. **Course access begins June 16, 2026, and content is available until June 16, 2027. Registration for the course is open until April 16, 2027.**

Topics covered:

- Fundamentals of Structural Geology and Geotechnical Applications
- Mapping and Interpretation
- Core, Drill hole, and Geophysical Analysis
- Basics of Structural Modeling
- Real-World Examples and Case Studies
- Emerging Technologies for Structural Data Collection and Analysis

\$999 USD

Discounts for GCE members, groups, and students.
